## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments filed on 09/14/2005 have been fully considered and they are persuasive.

### ***Allowable Subject Matter***

Claims 1, 2, 12 and 14-16 are allowed.

The following is an examiner's statement of reasons for allowance: claims 1, 2, 12 and 14-16 are allowed because the references cited fail to teach, as applicant has, a first E/O converter and a second E/O converters each for converting the output signal of each of the first and second digital modulators into an optical signal having a wavelength different from each other; a first O/E converter and a second O/E converters each for converting the optical signal transferred from each of the first and second E/O converters into an electric signal; and a quadrature modulator for performing quadrature modulation on carrier wave by the output signal of each of the first and second O/E converters, as an I signal and a Q signal, respectively, as the applicant has claimed. Fujino and Sato (JP06164427) disclose a first E/O converter and a second E/O converter transmitting the modulated signal in Intermediate Frequency (IF) instead of in baseband.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
